

Adaptor GS/GST/GSM/GC Family Labeling Change Revision Notice

In order to enhance the auto-production degree and reduce the color fading issue of label stickers resulting from a long-time use, MEAN WELL conducted this labeling revision on 40~280W [PS.1] models of the GS/GST/GSM/GC adaptor family. The current manually-applied stickers will be transformed to laser engraving printings (as the illustrations shown below).

MEAN WELL has finished the safety certification related works for this labeling change. This change of labeling does not affect the electrical specification or certifications of the products. In order to keep the market competitiveness, MEAN WELL fully takes in the addition on the relevant cost, making no adjustment on the pricing. Hereunder are the details of this change. Should there be any questions, please contact MEAN WELL sales representatives.

[PS.1] This revision is not suitable for GS18/25/36, GST18/25/36 and GSM18/25/36 series due to the heat venting holes on the case; therefore, these series remain the use of manually applied stickers.

1. Revision Schedule: Production version switch will start on **2016/10/08 (W1610D production lot)**
2. Revision Overview:

Revision Models	GS Family : GS40A/60A/90A/120A/160A/220A/280A GST Family : GST40A/60A/90A/120A/160A/220A/280A GSM Family : GSM40A/B, 60A/B, 90A/B, 120A/B, 160A/B, 220A/B GC Family : GC120A/160A/220A/330A (including modified models)	
Revision Contents (Taking GS120A24-P1M model as example.)		Before: Stickers (Manually applied)
		After: Laser engraving (Automatically-printed)
